## CGI Scripts

Each shared Linux web hosting account comes with its own cgi-bin, in which you are free to use any\* CGI scripts you wish.

*\*See the Server Resource Abuse section.*

## Child Pornography

Our policy on child pornography is zero tolerance. Mirackle solutions will cooperate fully with any criminal investigation into a Customer's violation of the Child Protection Act of 1984 concerning child pornography. Customers are ultimately responsible for the actions of their clients over the Mirackle solutions network, and will be liable for illegal material posted by their clients.

According to the Child Protection Act, child pornography includes photographs, films, video or any other type of visual presentation that shows a person who is or is depicted as being under the age of eighteen years and is engaged in or is depicted as engaged in explicit sexual activity, or the dominant characteristic of which is the depiction, for a sexual purpose, of a sexual organ or the anal region of a person under the age of eighteen years or any written material or visual representation that advocates or counsels sexual activity with a person under the age of eighteen years.

Violations of the Child Protection Act may be reported to the U.S. Customs Agency at 1-800-BEALERT

## Chat Rooms

We do not allow clients to install their own chat rooms within a shared hosting account, without approving it with the Mirackle solutions Support Team. Most chat rooms tend to be large system hogs and we cannot allow it as an account option.

## Background Running Programs

We don't allow programs to run continually in the background. Some background programs are CPU and memory intensive and hence we don't allow them to run on a shared hosting server. If your application needs some background program(s) to run, we may suggest you a dedicated server or a VPS.

## IRC

We do not allow IRC clients or IRC bots to be operated on any of our servers. In addition, IRC servers are not permitted on our network. Anyone found to be in violation of this policy risks immediate account termination.

## Proxy

Web proxy scripts are prohibited. This includes any script, such as nph-proxy, that allows anyone to browse to a third party web site from any server in the MIRACKLE SOLUTIONS network or that otherwise masks the true origination point of browsing activities by use of network information associated with Mirackle solutions. Such scripts will be deleted when found. Repeated violations will result in account suspension or termination.

## Software Downloads

We don't allow any software to be stored in your website for downloads. The webspace for the website contains space allotted for storing the website related content like HTML, ASP/ASP.NET/PHP/JSP/Perl scripts, GIF, Jpeg and Png Images, SWF files, SQL database, MySQL Database and MS Access Database files. Allowing software (third-party or own) to be downloaded from the website is strictly prohibited as it consumes lot of unnecessary bandwidth and thus hogs the performance of the server. Violation of this rule may result in immediate suspension or termination of services without prior notification. Files with extensions like .exe and .msi are treated as software downloads and are not allowed on shared hosting. Violation of this rule may result in immediate suspension or termination of services without prior notification.

## Audio/Video Streaming

We don't allow Audio/Video streaming on our shared hosting servers as it hogs the CPU and bandwidth. Mirackle Solutions reserves the rights to terminate any account found to contain file streaming such as audio, radio and video streams (AVI, MPG, MPEG, MOV, MP3, PODCASTS, etc.) This violated occurrence will be notified by our content auditing team and you will be given 3 days to backup your files. Should the problem persisted within the allotted time period, the files will be deleted. We recommend Flexi Cloud servers or dedicated servers for Audio/Video Streaming. You can, however, run flv videos on your website, the size of the flv video not exceeding 5 MB.

## **Excessive Use/Overages**

You will not exceed the bandwidth, storage and E-mail usage limits outlined by your particular web hosting package. If you use any bandwidth or storage space in excess of the agreed upon number of megabytes/gigabytes per month, Mirackle solutions may, in its sole discretion, assess you with additional charges. If Mirackle Solutions elects to take any corrective action, Mirackle Solutions will not refund any unused pre-paid fees. Your use of your account and access to it is your responsibility. You are responsible for any unauthorized access to your account resulting in bandwidth, storage and/or E-mail usage exceeding the limits outlined in your particular web hosting package specifications and resultant charges. Bandwidth overages are currently billed at \$12/GB/month or Rs. 500/GB/month. For Disk space overages, you will have to upgrade the package to the next available plan.

## **Heavy Database Size**

Miracle Solutions allows not more than allotted space for SQL Database, on shared hosting and suggests hosting of larger database on either Application Hosting or Dedicated Server. Miracle Solutions reserves the right to deny support for issues arising out of transactions on large databases.

## **INODES**

The use of more than 250,000 inodes on any Linux shared hosting account or more than 250,000 files/folders in Windows shared hosting account may potentially result in a warning first and if no action is taken future suspension. Accounts found to be exceeding the 100,000 inode/files limit will automatically be removed from our backup system to avoid over-usage; however databases will still be backed up. Every file (a webpage, image file, email, etc.) on your account uses up one inode.

Sites that slightly exceed our inode limits are unlikely to be suspended; however, accounts that constantly create and delete large numbers of files on a regular basis, have hundreds of thousands of files, or cause file system damage may be flagged for review and/or suspension. The primary cause of excessive inodes seems to be due to users leaving their catchall address enabled, but never checking their primary account mailbox. Over time, tens of thousands of messages (or more) build up, eventually pushing the account past our inode limit. To disable your default mailbox, login to cPanel and choose "Mail", then "Default Address", "Set Default Address", and then type in: :fail: No such user here.

## **Bulk Emailing**

Sending Bulk emails from shared hosting accounts is strictly prohibited. You cannot send more than 500 emails per domain per hour and more than 100 emails per user per hour. Violation of the email policy may result into suspension of the domain.

## **Unlimited Defined**

- A website cannot use more than 25% of CPU. Users are supposed to optimize their websites/web applications so that the system resources are not used more than the limit allowed. In Windows Shared hosting server, once the application reaches the 25% CPU limit, the application pool will be recycled.
- A website cannot use more than 256 MB Physical Memory. Users are supposed to optimize their websites/web applications so that the system resources are not used more than the limit allowed. For Reseller hosting packages, the physical memory limit per application is 100 MB.
- User cannot run MySQL or MS SQL Queries for more than 15 seconds. The MySQL/MS SQL tables should be properly optimized.
- Each database user is limited to maximum 25 concurrent connections.
- Each mailbox is assigned maximum 1 GB space and each mail domain is assigned maximum 5 GB space.

- The hosting space cannot be used to store personal backups and should contain only the files related to the website, the emails and the databases.
- Mirackle solutions does not allow hosting of any third party software on shared hosting servers. DLLs can be allowed after complete verification of the documentation. In case of a custom DLL, Mirackle solutions will need the source code of the DLL before allowing the DLL to be registered on the server. DLL files created by compiling asp.net program are excluded from this restriction. Registering of DLL for first time is free, subsequent re-registration of DLL will be charged at Rs. 500/- plus service tax.
- Mirackle solutions does not allow running of any p2p or torrent software on its shared hosting server.

## **No-Spam Policy**

We are Zero-Tolerant towards spamming and don't allow any kind of spamming activity from our servers or network. A spam complaint will first result in a warning of 24 hours and failure to take action against the spamming will result in the suspension of account. Mirackle Solutions reserves the right to permanently terminate hosting of a domain without notice due to repeated spam complaints and there will be no refund on such termination. Hosting of Spamvertised websites will result into immediate termination with/without notice.
